💼 Professional Experience

Frontend Developer

01/2024 – 02/2024

I focused on developing the overall look and design of websites, writing code using languages such as HTML, CSS, and Java. My experience includes producing, maintaining, and modifying websites and user interfaces, as well as incorporating applications, graphics, audio, and video clips. I have also completed several personal projects since then.

Agro Exchange, Internship

01/2023 – 03/2023

I was responsible for piloting drones and contributed to collecting GIS data from the field. Additionally, I participated in the graphic design of flyers to advertise a webinar program. I assisted my seniors in running analyses using ArcGIS software and Google Earth Pro

🔗 Activities

Design and optimization of a responsive webpages with a well-integrated database and, intuitive designs

Building And Arrangements Of Clean Codes
